

CIIT Training Institute Pvt Ltd

Dot Net Full Stack Development with Azure DevOps

Course Duration: 9 Months

Total Fees: 45+ 18%

Core Benefits

Training in .NET Core Full Stack with Azure DevOps bridges the gap between writing code and shipping high-quality products. It transforms you from a siloed developer into a versatile professional capable of managing the entire application lifecycle—from user interface design to automated cloud deployment.

- **End-to-End Versatility:** You gain the ability to build the entire system: front-end (React/Angular/Blazor), back-end (ASP.NET Core APIs), databases (SQL Server/EF Core), and the deployment infrastructure.
- **High Market Demand & Salary:** Full-stack .NET developers are among the most sought-after roles in 2026. Employers prioritize these "independent" developers because they reduce team size and communication gaps, often leading to significantly higher pay packages.
- **Future-Proof Skills:** .NET Core is open-source, high-performance, and cross-platform (Windows, Linux, macOS). Training ensures you are ready for modern architectures like microservices and cloud-native development.

Strategic Career Outcomes

- **Diverse Job Roles:** Completion of this training opens doors to high-paying positions such as:

- **Full-Stack .NET Developer**
- **Cloud DevOps Engineer**
- **Backend API Specialist**
- **Site Reliability Engineer (SRE)**
- **Market-Ready Portfolio:** You will graduate with a GitHub portfolio of real-world projects, such as an E-commerce portal or a SaaS application, which significantly boosts employability.
- **Higher Earning Potential:** Professionals with both full-stack and DevOps expertise typically command higher salaries (average entry-level in **India: ₹4.5 – ₹6.5 LPA**) compared to single-skill developers.

100% Money Back Guarantee

5-Day Money-Back Guarantee: Till date We have trained 10000+ candidates including under graduates, freshers and working professionals with expert knowledge. All are satisfied with our training quality. So we are giving guarantee to all those who want to join our institute that if you're disappointed for whatever reason, you'll get your 100% refund. We won't make you invoke any rules or conditions – if you're not satisfied within your first 5 days then we'll refund you without any excuse.

Training Institute

Syllabus

Frontend Development

- **Web Fundamentals:** HTML5, CSS3, and JavaScript fundamentals.
- **Frontend Frameworks:** Building Single-Page Applications (SPAs) using either Angular, React, or Blazor. This includes topics like components, routing, state management, and API integration.
- **UI Libraries:** Utilizing CSS frameworks such as Bootstrap or Tailwind CSS for responsive design.

Backend Development (.NET Core/8/9/10)

- **Core C# & OOP:** Advanced C# concepts, Object-Oriented Programming (OOP) principles, LINQ, Generics, and exception handling.
- **ASP.NET Core:** Building web applications using ASP.NET Core MVC (Model-View-Controller) and Razor Pages.

- **Web APIs & Microservices:** Designing and implementing RESTful Web APIs, API versioning, authentication (JWT, OAuth), and microservices architecture with Docker and Kubernetes integration.
- **Key Concepts:** Dependency Injection, Middleware, configuration, logging, and security best practices.

Database & Data Management

- **Relational Databases:** Working with SQL Server, understanding RDBMS concepts, T-SQL queries, and data integrity.
- **ORM:** Using Entity Framework (EF) Core for database interactions (Code First/Database First approaches, migrations, advanced querying).
- **Cloud Databases:** Introduction to Azure SQL Database and Cosmos DB.

Azure DevOps & Cloud Integration

- **DevOps Fundamentals:** Understanding the DevOps lifecycle, Agile methodologies (Scrum), and the importance of CI/CD.
- **Version Control:** In-depth Git and Azure Repos (branching strategies, merging, pull requests, and command line operations).
- **Azure Pipelines (CI/CD):** Creating and managing automated build and release pipelines for continuous integration and continuous deployment.
- **Azure Boards:** Utilizing boards for project management, backlog management, sprint planning, and tracking work items.
- **Azure Artifacts/Test Plans:** Managing application dependencies and implementing test management strategies.
- **Containerization & Orchestration:**
 - **Docker:** Building and managing Docker images and containers using Docker files.
 - **Kubernetes (AKS):** Introduction to Azure Kubernetes Service for orchestrating containerized applications.
- **Azure Cloud Services:**
 - **Azure Fundamentals:** Core concepts of Azure regions, availability zones, and infrastructure.
 - **Deployment Targets:** Deploying applications to Azure App Services, Azure Functions, and Virtual Machines.

- **Infrastructure as Code:** Overview of ARM templates or Terraform for automating infrastructure deployment.
- **Monitoring:** Using Azure Monitor and Application Insights for logging and performance monitoring.

Generative AI (GenAI)

- **Large Language Models (LLMs):** Understanding open vs. closed models, cost structures, and latency.
- **Prompt Engineering:** Techniques for effective prompting and practice scenarios.
- **Retrieval-Augmented Generation (RAG):** Connecting models to live data using vector databases like Pinecone or ChromaDB.
- **Fine-tuning:** Customising LLMs for specific industry use cases.

Agentic AI & Multi-Agent Systems

- **AI Agent Fundamentals:** Proactive vs. reactive AI, goal-driven behavior, and autonomous planning.
- **Frameworks & Orchestration:** Building agents using tools like LangChain, LangGraph, CrewAI, or Phidata.
- **Agentic Workflows:** Multi-agent collaboration, memory management, and Agent-to-Agent (A2A) communication.
- **Automation Integration:** Connecting agents to tools via n8n or Model Context Protocol (MCP)

Project Work & Interview Preparation

- **2+ Real Time Projects**
- **Weekly 2 technical mock interviews**
- **Weekly 2 Programming Tests**
- **Weekly 2 HR mock interviews**

Our Alumni works at Top MNCs & Indian Companies. So Can You!

KEY Features that Make Us Better and Best Campus for You
